6. ISSUING OFFICE Federal Highway Administration (FHWA) Central Federal Lands Highway Division (CFLHD) Attention: Brenda/Lori K (HFAC-16) 12300 West Dakota Avenue, Suite 360 Lakewood, CO 80228				7. PROJECT TITLE AND LOCATION CO ROMO 10(4), Trail Ridge Road Rocky Mountain National Park Grand and Larimer Counties, Colorado			
<p>8. The major intent of this pre-show is familiarize potential bidders with the project components, specifically the geotechnical repair sites located near the high point of the road. These repair sites are located in mountainous terrain that severely limits the working space available and makes maintenance of traffic during construction operations extremely difficult. Since this project will be advertised during the winter months, this pre-show allows potential contractors the opportunity to view the work sites prior to winter closure of the road.</p> <p>Potential bidders interested in attending the pre-show, must contact Brenda McGehee at 720-963-3353 or Lori Kliethermes at 720-963-3355 no later than Tuesday, September 6, 2005. Attendees should meet at the Beaver Meadows Visitor's Center (off Highway 36 west of Estes Park, Colorado) no later than 9:00 a.m. on September 8, 2005.</p> <p>Preliminary plans and specs will be available for review during the pre-show. Forms for the submission of written questions will be distributed during the pre-show.</p>							
9. Estimated Cost Range of Project (In Accordance with FAR SubPart 36.204)				10. Offers Restricted to Small Business concerns?		11. Subcontracting Plan Required?	
A. From: >\$10,000,000.00		B. To:		<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO Type of Set-Aside:		<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO	
12. DESCRIPTION OF WORK							
<p>This project consists of rehabilitation and resurfacing on approximately 33 kilometers of Trail Ridge Road in Rocky Mountain National Park. Several slump and rock armor repairs near the high point of the road are also included. Principal work items on this project include:</p> <ul style="list-style-type: none"> • Mobilization • Contractor Testing • 27,000 cubic meters of Subexcavation • 24,000 square meters of Biaxial Geogrid • 55,000 metric tons of Superpave Asphalt Concrete Pavement • 105,000 square meters of Asphalt Pavement Milling • 300,000 square meters of Foamed Asphalt Stabilized Base Course • 13,500 square meters of Geocomposite Capillary Break System • Traffic Control
